PLASTIC EDGE PROTECTOR

"Plastic edge protectors: safeguarding corners with resilient precision."

"Strength in simplicity, plastic edge protectors shield with steadfast grace."

SAFE

BROWEN CORRUGATED CORNER PROTECTORS

Brown corrugated corner protectors are durable cardboard devices designed to safeguard the corners of goods during transportation or storage. They prevent damage to fragile items such as furniture, mirrors, or artwork, and blend seamlessly with standard packaging materials. Easy to apply and effective, these protectors maintain a professional appearance while providing reliable corner protection.

SECURE

SILICA GEL

Silica gel is a mixture of water and silica (a common mineral found in sand, quartz, granite, and other minerals) that forms into tiny pellets when combined. Silica gel is a type of desiccant that holds water vapor at its surface instead of fully absorbing it.

LASHING BELT

Lashing buckles are ladder buckles for heavy duty lashing strap. Vels Enterprises strapping buckles include steel wire strapping buckles and lashing buckles. Wire buckle is used as cord strap buckles. Lashing buckles are ladder buckles for heavy duty lashing strap.

POLYPROPYLENE SHEETS

Polypropylene (PP) sheets are lightweight and durable, offering excellent chemical resistance and versatility in various industries. Their recyclability makes them an environmentally friendly option, contributing to waste reduction and resource conservation. With superior moisture resistance and safety for food and medical applications, PP sheets are a reliable choice for diverse packaging and manufacturing needs.

SUTLI

Precisely engineered Industrial Sutli Plant is used in several packaging industries for performing loose packing function, tying of bags and become a substitute of jute string along with making twisted ropes.

PET STRAP

PET Strap (polyethylene terephthalate strap also known as polyester strap) is often used where formerly steel strap was applied. PET has different characteristics compared to general Polypropylene strapping (also known as PP strap) such as it's retention capabilities.

PP WOVEN FABRIC

PP Woven Fabric, made from Polypropylene is used for a wide range of commercial, industrial, and manufacturing applications. These fabrics possess high tear resistance due to multiple layering which makes them strong, economical and reliable packaging options for transporting commodities.
